Allowable Subject Matter

1. This office action is in response to the amendment filed on 08/29/05.
2. Claims 1, 3-13, 16-20, 22-29 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Upon further consideration, prior art of record, closest reference (Rinne – US 5,987,063), taking alone or collectively, fails to fairly teach a particular method for compensating sampling frequency offset utilizing an separate Fourier Transform including “compensating for the sampling frequency offset in dependence on a difference between phase variation at the respective points, each phase variation representing a difference between the phase value derived for that point and further phase data” in independent claims 1, 22 (claims 3-13, 28 and 16-20, 23-25, 29 depend therefrom) or “determining, for each point, a phase variation corresponding to the difference between the phase values at different parts of an OFDM symbol separated by the useful part of the symbol; compensating for an offset of the sampling frequency in dependence on the difference between the phase variations” in independent claim 26 (claim 27 depend therefrom). Thus, claims 1, 3-13, 16-20, 22-29 are found to be novel and unobvious over prior art of record.
